

Aaron A. Anderson, Project Manager, Joins JDI Contracts Inc.

COHASSET, MN (January 11, 2010) – JDI Contracts Inc. is pleased to announce that Aaron A. Anderson has joined the organization as a project manager.

“We are excited to have Aaron as part of our team,” said Roger L. Hoyum, president of JDI Contracts Inc. “His leadership skills and broad project experience are valuable additions to our organization and we look forward to the expanded capabilities we will be able to offer our clients.”

Anderson is an experienced mechanical engineer, project manager, and business manager with over 30 years of experience in the mining, manufacturing, and power industries.

As a former account manager with Minnesota Power, Anderson worked with a variety of large industrial customers at their processing facilities. He developed, implemented, and maintained large electric service contracts, managed customer growth initiatives, and developed deep relationships with key customers. Over a ten year period, he worked on several capital projects, including a coal system upgrade, electric service extensions, and numerous strategic initiatives such as wind power assessments.

“Being part of JDI’s diverse team allows me to continue my career with an organization committed to working with customers through all phases of a project, from development to startup. I am excited to be part of a growing organization with a record of project successes,” says Anderson. “Aaron’s varied experience and his commitment to customer satisfaction make him a valuable resource to our clients and internal teams, regardless of industry,” according to Hoyum.

Anderson, a registered Professional Engineer, received his Bachelor of Science in mechanical engineering from Michigan Technological University in Houghton, MI and his Masters of Business Administration from the University of St. Thomas in St. Paul, MN. He lives in Mt. Iron, MN with his wife Judy.

About JDI Contracts Inc.

JDI Contracts Inc. provides integrated leadership, technical, business, and site support services to production-oriented operations. JDI utilizes best-in-class program management and implementation methods to guide and strengthen owner teams through the entire project life cycle, including development, design, construction, startup, and operations phases.

Owner representation services are backed up by extensive real world experiences in management, engineering and design, accounting and finance, information technology, and construction and maintenance craft work. JDI leads diverse stakeholder teams through all project phases by collaboratively developing a complete project road map, then navigating to an in-service notification on time, under budget, and within specifications.
